SealEx 100

SolarEx

Protect, Generate!

key features

- Superior Waterproofing ✓
- Exceptional Adhesion ✓
- Eco-Friendly ✓
- Durable & Flexible ✓
- UV, Alkali, and Acid Resistant ✓

SealEx 100 is a high-performance, water-based elastomeric coating that delivers exceptional waterproofing and UV resistance. Designed for application over surfaces like concrete, metal, wood, and asphalt, it cures quickly to form a flexible, durable membrane. Ideal for coastal, humid, and alkaline environments, *SealEx 100* adheres tenaciously and resists wear, salts, and acids. It's an eco-conscious solution with low VOCs and no harmful additives—perfect for long-term protection and environmental safety.

High Performance Waterproof Protection

Before

After

ElastEx 200

SolarEx

Protect, Generate!

key features

- Seamless Waterproof Barrier ✓
- Applies Over Existing Roofs ✓
- Available In Custom Colors ✓
- High Reflectivity ✓
- Flexible & Durable ✓
- Quick Curing ✓

ElastEx 200 is a high-performance, elastomeric waterproofing coating for new or existing roofs. This bright white, flexible membrane adheres tenaciously, resists weathering, and significantly lowers cooling costs through solar reflectance. Its water-based, low-VOC formula is environmentally safe and easy to apply over most roof types without requiring a tear-off. Designed for performance in harsh environments, *ElastEx 200* delivers long-lasting, breathable protection that bridges cracks and withstands wear.

Extend Your Roof's Waterproofing Life

AcrylEx 300

SolarEx

Protect, Generate!

key features

- Can Be Applied To Roofs & Exterior Walls ✓
- Dirt & Mildew Resistant Finish ✓
- Fast-Curing & High Coverage ✓
- Available In Custom Colors ✓
- Highest Reflective Indexes ✓

AcrylEx 300 is a 100% acrylic latex top coat engineered for durability, reflectivity, and environmental safety. Designed to stay clean and resist microbial growth, it enhances energy efficiency and protects surfaces with a high-performance finish. Its superior reflectance and UV resistance make it ideal for roofs, solar installations, and historic structures. With fast curing, high coverage, and compatibility with many substrates, *AcrylEx 300* is the smart choice for long-lasting, eco-friendly surface protection.

BleedEx 400

SolarEx

Protect, Generate!

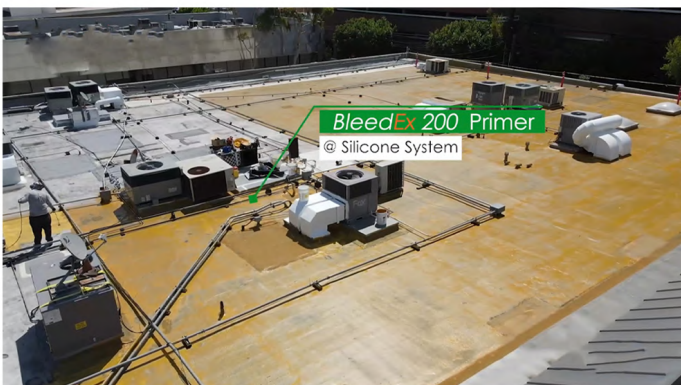

key features

- Strong Adhesion to Difficult Surfaces ✓
- Bridges Cracks & Prevents Peeling ✓
- Enhances Topcoat Performance ✓
- Bleed-Through Prevention ✓
- Extreme Durability ✓

BleedEx 400 is a high-performance, water-based elastomeric coating designed to stop asphalt bleed-through and enhance adhesion. Ideal for use under silicone and acrylic topcoats, it forms a durable, flexible, and UV-resistant membrane. With exceptional tensile strength and low vapor permeability, it protects existing roofs without the need for tear-off. This environmentally friendly primer cures quickly and bridges hairline cracks, offering reliable surface preparation for long-lasting roof systems.

Tough, longlasting protective membrane

SiliconEx 500

SolarEx

Protect, Generate!

key features

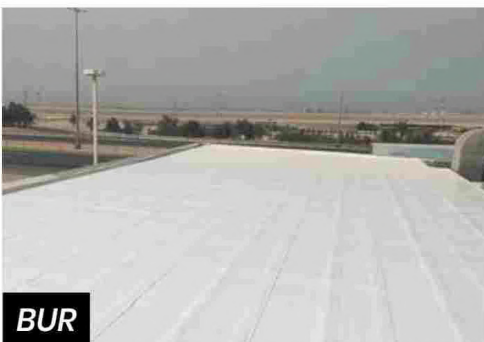

- Quik drying ✓
- 100% waterproof ✓
- Cool Roof & UV resistant ✓
- Lasting protection with a single coat ✓
- Highest adhesion with all types of substrates ✓

SiliconEx 500 Premium 100% Silicone Roof Coating: Specially designed to maintain highest level of waterproofing and solar reflectivity even as it ages. Superior performance and durability for all types of roof restorations. Single component, moisture cured, fluid applied and high solids roof coating. Formulated with solvent free polymers with no harmful effect to the environment. **SiliconEx 500** creates a shield which not only provides waterproofing and cool roofing but also extends the life of your roof. Ideally suited for flat and pitched roofs.

Premium Liquid Silicone RoofCoating

100% Silicone White Roof Coating - Solvent Free

RoadEx 600

SolarEx

Protect, Generate!

key features

- Excellent Visibility ✓
- Superior Durability ✓
- Fast-Drying Formula ✓
- Versatile Application ✓
- Eco-Friendly Compliance ✓

RoadEx 600 Series is a water-based, fast-drying acrylic marking paint engineered for long-lasting performance in traffic and parking applications. Compliant with federal specifications TT-P-1952F, this paint delivers excellent durability, visibility, and adherence on asphalt and concrete surfaces. Ideal for highways, airports, crosswalks, and lots, it offers quick drying, easy application, and environmental safety. Available in white, yellow, and black.

formulated for ease of use and durability

FirEx 700

SolarEx

Protect, Generate!

key features

- Class A Fire Rating ✓
- High Reflectivity ✓
- Extends Roof Life ✓
- Waterproof & Durable ✓
- Available In Custom Colors ✓
- Excellent Adhesion & Flexibility ✓

FirEx 700 is a high-performance, fire-resistant, and waterproof elastomeric coating designed for diverse surfaces like roofs, walls, wood, and metal. Rated Class A and delivering over 90% reflectivity, it improves safety, energy efficiency, and roof longevity. Its water-based, low-VOC formula ensures minimal environmental impact and easy cleanup. Ideal for both restoration and new construction, Firecade provides seamless, flexible protection with outstanding durability in harsh environments, including coastal, hot, or alkaline conditions.
